Professional Summary

Aspiring DevOps Engineer with hands-on experience in Linux, Git, Docker, AWS Cloud, REST APIs and containerized application development. Strong understanding of CI/CD concepts, networking fundamentals and cloud infrastructure. Passionate about Kubernetes, Terraform, Infrastructure as Code and automation. Quick learner eager to contribute to enterprise-grade DevOps and cloud engineering projects.

Technical Skills

DevOps & Cloud: Linux, Git, GitHub, Docker, AWS (EC2, S3, IAM), CI/CD, Containerization

Learning: Kubernetes, Terraform, Infrastructure as Code (IaC), GitHub Actions

Programming: Java, JavaScript, Python (Basics)

Web: React.js, Node.js, Express.js, FastAPI, REST APIs

Database: MongoDB, SQL

Core: Operating Systems, Networking, Version Control, Microservices Fundamentals

Projects

Skill Sprint – MERN Coding Practice Platform

Developed a MERN platform with authentication, coding challenges and leaderboards. Containerized using Docker, managed code with Git/GitHub, built REST APIs and MongoDB integration, following deployment-ready development practices.

Resume Sphere AI – ATS Resume Analyzer

Built an AI-powered FastAPI application for ATS scoring, NLP-based skill extraction, grammar analysis and PDF report generation with REST API integration..

Education

B.E. Electrical & Electronics Engineering – Sri Shakthi Institute of Engineering and Technology (2023–2027) | CGPA: 7.3

Higher Secondary – Kadri Mills Higher Secondary School (2023) | 65%

Certifications

- AWS Cloud Practitioner Essentials
- Infosys Springboard – Java Basics
- Java Hibernate
- MATLAB

Soft Skills

- Problem Solving
- Collaboration
- Communication
- Adaptability
- Continuous Learning
- Time Management
